Don't be over confident !

Hello Neeraj,

I think its not your fault. May be because of lack of knowledge.

Go to www.bigrock.in website choose .com and give name there as talentacquisition-wipro.

Go on & pay for hosting also.

Congratulation! you create www.talentacquisition-wipro.com.

Now, Create mail server and mail id by Neeraj@talentacquisition-wipro.com. Ooh great! you'r one of Wipro HR now.

Please understand the concept of domain.

As your mention "recruitment-wipro.com", recruitment & wipro.com between contain "-" not "."

"." represent child domain of parent domain.

If mail came from "recruitment.wipro.com", which contain "." in between. So now "recruitment" is part of wipro.com domain.

And then you may can challenge! Don't over confident.

Hope its clear now with example.
